Students from the Aachen University of Applied Sciences under the direction of Prof. Thomas Tünnemann present conceptual sketches and model studies based directly on their individual investigations and perceptions of space.

What lies behind space as something that is readily apparent, static? How can such impressions and perceptions of space be translated into simple wooden model?

The exhibited objects, fashioned from found pieces of wood and wooden boards, depend upon the languages of metaphysics, poetry, and reverie, but are also dedicated quite concretely to the creation of three-dimensional space. Everyday life, architecture, sculpture, and narrative forms are explored, elaborated, and heightened artistically from a variety of perspectives. Opening itself up to visitors, seemingly fortuitously, is a space that lies behind, a hidden space, a metaspace.

The exhibition opening will take place on Saturday, January 11, 2014, 4 PM at gallery *Zweigstelle Berlin*. You and your friends are cordially invited to attend.

The exhibition is curated by Isolde Nagel / A TRANS. The exhibition will be accompanied by a catalogue.
